A Silent Aftermath

On March 11, 2011, a massive earthquake and tsunami struck the northeastern coast of Japan, triggering one of the most severe nuclear accidents in history. The Fukushima Daiichi nuclear plant was catastrophically damaged, releasing vast amounts of radioactive material into the surrounding environment.

In the aftermath of the disaster, the region became a ghost town, evacuated and abandoned. However, within this desolate landscape, the forgotten victims of the nuclear fallout remained, their bodies and spirits forever marked by the tragedy.
