

# How Innovative Self-Financing Pollinator Enterprises Can Grow Jobs And Feed a Hungry Planet

## The Importance of Pollinators

Pollinators are essential to our food system. They are responsible for pollinating over 90% of the world's flowering plants, including many of the fruits, vegetables, and nuts that we eat. Without pollinators, our food supply would be severely diminished.

Unfortunately, pollinators are in decline. A number of factors are contributing to this decline, including habitat loss, pesticide use, and climate change. As a result, the number of pollinators has declined by as much as 40% in recent years.

## The Local Economy Solution: How Innovative, Self-Financing "Pollinator" Enterprises Can Grow Jobs and Prosperity

## The Role of Self-Financing Pollinator Enterprises

Self-financing pollinator enterprises are one way to address the decline of pollinators. These enterprises are designed to generate income while also providing benefits to pollinators. For example, a self-financing pollinator enterprise might sell pollinator-friendly plants, provide pollination services to farmers, or offer educational programs about pollinators.

Self-financing pollinator enterprises can play a significant role in addressing the decline of pollinators. By generating income, these enterprises can help to fund conservation efforts. They can also raise awareness about the importance of pollinators and provide educational opportunities about how to protect them.

### Case Studies

There are a number of successful self-financing pollinator enterprises operating around the world. Here are a few examples:

- **The Pollinator Partnership** is a non-profit organization that provides educational resources and technical assistance to farmers and other land managers on how to create and maintain pollinator-friendly landscapes.
- **The Xerces Society** is a non-profit organization that works to protect pollinators through research, education, and conservation programs.
- **Bee City USA** is a program that certifies cities and towns that are committed to creating sustainable habitats for pollinators.

These are just a few examples of the many innovative self-financing pollinator enterprises that are operating around the world. These

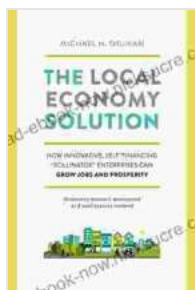

enterprises are playing a vital role in addressing the decline of pollinators and helping to ensure a sustainable food future.

Self-financing pollinator enterprises are a promising way to address the decline of pollinators and feed a hungry planet. These enterprises can generate income while also providing benefits to pollinators. By supporting these enterprises, we can help to protect pollinators and ensure a sustainable food future.

Here are some ways that you can support self-financing pollinator enterprises:

- Buy products from companies that support pollinators.
- Donate to organizations that are working to protect pollinators.
- Volunteer your time to help with pollinator conservation efforts.
- Educate others about the importance of pollinators.

By taking these actions, you can help to make a difference for pollinators and for the future of our food system.
