Benjamin Graham was born on May 9, 1894, in London, England. His family immigrated to the United States when he was a young boy. After attending Townsend Harris High School in New York City, he went on to study economics at Columbia University, where he graduated Phi Beta Kappa in 1914. He subsequently worked as a Wall Street runner before returning to Columbia Business School to earn an MBA in 1921.

Graham developed a unique investing approach that emphasized the intrinsic value of a company, rather than its market price. He believed that by purchasing stocks that traded below their intrinsic value, investors could achieve superior returns over the long term. This approach, known as value investing, was a departure from the prevailing speculation-driven market practices of the time.
