Cartwright's meticulously recorded observations, known as the Labrador Papers, offer an invaluable window into a world that was on the cusp of profound transformation. This extraordinary collection of documents, recently rediscovered and meticulously transcribed, provides a treasure trove of firsthand accounts, scientific data, and cultural insights that have captivated scholars and historians alike.

The Man and His Mission

Captain George Cartwright was born in 1739 into a wealthy Nottinghamshire family. From a young age, he exhibited an unquenchable thirst for adventure and a keen interest in natural history. In 1765, he joined the British Navy and quickly rose through the ranks, earning a reputation for his bravery and leadership.

In 1770, Cartwright was appointed to command the sloop HMS Niger on a mission to explore the coast of Labrador. His primary objective was to establish trading posts for the Hudson's Bay Company and to gather intelligence on French and Spanish activities in the region.

Exploring the Untamed Wilderness

Cartwright's explorations of Labrador spanned several years, during which time he traversed treacherous waters, climbed rugged mountains, and ventured into the depths of the unforgiving wilderness. He encountered a diverse array of wildlife, including polar bears, walruses, and whales, and recorded his observations with meticulous detail.

Beyond his scientific pursuits, Cartwright also took a keen interest in the indigenous Inuit communities of Labrador. He learned their language, studied their customs, and documented their traditional way of life. His writings provide a rare glimpse into a culture that was rapidly changing under the influence of European exploration and trade.

The Labrador Papers: A Literary and Scientific Legacy

The Labrador Papers, consisting of over 1,000 pages of handwritten text, were a testament to Cartwright's extraordinary powers of observation and his insatiable curiosity. They contain a wealth of information on the

geography, flora, fauna, and indigenous peoples of Labrador, as well as Cartwright's own personal reflections on his experiences.

The Labrador Papers were first published in three volumes in 1792 and quickly became a bestseller. They were widely read and admired by scientists, explorers, and the general public alike. Cartwright's vivid descriptions of the Labrador wilderness and his encounters with the Inuit sparked a fascination with this remote and enigmatic region.

Rediscovering a Lost Treasure

For over a century, the original Labrador Papers were believed to be lost. However, in 2016, they were serendipitously rediscovered in the archives of the Royal Geographical Society in London. This remarkable find has allowed scholars to access Cartwright's firsthand accounts in their entirety, providing a wealth of new insights into the history and culture of Labrador.

The Enduring Legacy of Captain George Cartwright
