The global economy is on the brink of collapse. This is not a prediction, but a fact. The evidence is all around us.

The world is awash in debt. Global debt has reached a record high of over \$250 trillion. This is more than three times the size of the global economy.

Central banks are printing money at an unprecedented rate. The Federal Reserve has increased its balance sheet by over \$4 trillion in the past year alone. The European Central Bank has also increased its balance sheet by a significant amount.

This money printing is creating inflation. The official inflation rate is at a 40-year high. However, the real inflation rate is much higher.

The stock market is overvalued. The S&P 500 is trading at a price-to-earnings ratio of over 20. This is well above the historical average.

The bond market is also overvalued. The yield on the 10-year Treasury note is at a record low. This means that investors are willing to pay a lot of money for a safe investment.

All of these factors are pointing to one thing: the global economy is on the brink of collapse.

When the collapse comes, it will be devastating. The stock market will crash. The bond market will crash. The value of real estate will plummet. Inflation will soar. Unemployment will skyrocket.

This will be the worst economic crisis in history. It will be worse than the Great Depression.

So, what can you do to protect your wealth?

There are a few things you can do to protect your wealth from the coming economic collapse.

- Own physical gold and silver.
- Own real estate.
- Own commodities.
- Avoid debt.
- Stock up on food and supplies.

These are just a few things you can do to protect your wealth from the coming economic collapse.

The most important thing you can do is to be aware of what is happening and to take steps to protect yourself. If you do, you will be able to weather the storm and come out on top.
